Discounts coming soon! Baker ? Does Baker Test Review have any work coupons? Currently, there are 3 verified work vouchers available baker test review. \$What can I save so much on the Baker exam review? In the last 30 days, people have saved nearly \$800 on baker's exam review. I got a free baker from Deloitte to work there and expired I want to renew it for half the price but when I ask online for a full price request how do I get it half? Comprehensive online textbooks (as well as print) 275 + hours of video tutorials per Adapt2U section learning technology 9200 + practice multiple choice questions 580 + practice simulation tasks based on 2 fake exams (in the section) interactive study planner 1400 digital educational cards from any additional cost unlimited academic support asymmetric scheduling for live courses there is no doubt that Baker is an excellent choice when it comes to the CPA prep exam. For 60 years, Baker has assisted in CPA exams review courses for more than a million CPA candidates to prepare and pass this difficult exam. Baker presents three different With the highest level cycle comes in at a premium cost. But rest assured that these costs are reasonable (thanks to useful funding options) and justified; recent additions to truly impressive and comprehensive review courses prove that sometimes you really get what you pay for. 3 session formats: Feature, Premium, and Pro includes annotated online textbooks (plus print) mobile app (Apple and Android) 275 + hours of video tutorials per 9200 section + practice multiple check questions with 580+ simulation-based exercise Tasks 400+ SkillMaster Videos 3 fake exams per section Adapt2U learning technology accounting for empires™ game to build knowledge and practice while playing against other interactive study planner different devices automatically synchronize your progress 1400 digital learning cards (included with feature) FastPass option For a quick review (included with feature) final review of last minute preparation (listed with Premium) 1-on-1 live academic lessons (listed with Pro) student support is unlimited (phone and email) it's no accident that Baker has been endorsed by the big 4 accounting firms; These high-impact companies often pay their employees to take this CPA exam of course review because it is very effective in preparing them for accounting major tournaments! Baker's success rate is impressive: more than 90% of all Elijah Watt Seal Award winners are prepared with Baker materials. As a reference, award winners must have a cumulative score above 95.50 on average across all four CPA sections and must pass them on their first attempt. However, it is difficult to look beyond the price. At a current rate of US\$2,299, Baker is one of the most expensive prep courses that students can choose. But compared to other courses in their price range, Baker is by far the best value given to the comprehensive study materials and great support! Well, that depends on it if you can afford it, you should consider subscribing to pro subscription. In addition to all their self-study materials, Adapt2U technology, flashcards, and final game content, you'll get live private lesson sessions via Webex. If you're not among the lucky few whose company will bill, you still have some options. While not as packed with features, Baker Premium and Feature Courses offer a lot of useful study materials at a lower price. In addition, you should consider a zero percent baker financing deal, or see if you are eligible to lower prices. Baker offers a funding option and significant discounts for a number of groups, including military and government employees, current students and recent graduates from for-profit universities, and state and local government officials. See baker's website for more specific information and details. All Baker clients have been pre-approved for zero percent financing for 18 months (although you should be aware that there is a \$125 processing fee for this loan). Payment plan option Also in the business so that soon you can pay in smaller monthly installments. You may also be eligible for a scholarship program. For others, check out the list of pros and cons below to help you make your decision! Choose from 3 course formats: Advantage, Premium, and Pro. Study from anywhere on your computer, phone, or tablet with the mobile app - your progress will automatically sync between your computer and mobile digital devices. You can even upload material to your device for study while offline and on the go. Use the interactive study calendar to schedule custom study sessions if you sign up for their Advantage course. You'll see if you're making enough progress to stay on track and be ready on exam day - your homepage will show the message you're not on track! If you're retarded. Baker Pro's top-rated courses come with TAs that you can call for additional support during and after the semester. 5 live video lesson sessions are included with this package that offers excellent one-on-one support. However, Baker also offers support options for premium students and feature. In general, academic support is good: Baker promises faculty and trainers to return to you within 48 hours, but usually within 24-36 hours. You can call or submit your question via their website via the Academic Support button. Unless you really need the traditional model of live lecture to learn materials (which include access to everything in the self-study course as well), we recommend premium option for flexibility at a reasonable price point. However, you should definitely choose to subscribe to The Pro Level if your company is billed! This huge report taking the last test they are often surprised by the extent to which Baker's incredibly multiple choice questions are closed and the simulations are for those on the exam. The format of 4-hour mock exams and question types are almost identical to the CPA exam, which is the gold standard for any course or prep test resource. Task-based simulations in particular get top reviews from former students, and some multi-choice questions are harder than you'll see on exam day. You'll get the same message so you can take an optional break. If you are studying with Baker materials, you need to know exactly what to expect. Additionally, Baker's team is constantly working on new ways to make their path look, and its function feels just like the CPA exam. Both calculator and spreadsheets are provided for use, just as in the test. The spreadsheet is not Excel, so they suggest you practice with Excel instead if you have. The course is updated at least twice a year, with more displayed if the test changes and new features are introduced. In fact, a new program is scheduled for November 13th. If you don't want to buy a new textbook when you make new changes, they have the option to print only new content pages from course pages. One A popular new feature is CPA SkillMaster videos. These short Videos that resemble YouTube are taught by experienced national trainers; They break specific simulation quests based on a one-step task at a time to show how to solve them quickly and accurately. Baker's goal is to get skillMaster video for every TBS in the course, and they have made great progress so far! Baker used to offer 2 fake exams for each exam section but they added a second version of one that closely parallels the actual exam. You will now have 3 practice exams for each of the four exam parts, with all the entirely new questions that do not appear in any other areas of the course. The first type of placebo test is a comprehensive test that assesses your understanding of the subject. That will help you scratch in on the additional practice problems that must be done before you take the other 2 fake exams, which simulate the actual CPA exam to experience the most authentic practice. In addition, Baker allows you to create your own phantom exams to practice more practices. This includes a progress test at the end of each unit that reviews past topics from earlier in the unit to make sure you don't forget them. You can choose specific topics and how many questions. Adjacent to the exaggeration, The Baker Collection of Traditional And Online Textbooks (Pre-Annotated), Pre-Recorded Lectures (150 Hours), Hordes of Multiple Choice Questions (9200+) and Hundreds of Mission-Based Simulations (580+) plus phantom exams and a host of other materials, gives you access to more than you need to be confident and well prepared for the actual CPA exam. If you want more practice, they even offer free digital learning cards (also available in print), additional questions about the multiple choice of practice, and the Final Review course for Premium subscribers that includes new multi-choice questions and lectures. The course is very easy to navigate from the home page. Adapt2U learning technology uses a short initial diagnostic test (4-8 questions) per unit to ensure that the course will adapt practice sessions and questions based on your strengths and weaknesses. Each module includes video lectures, skill selections, multiple selection questions, and task-based simulations at the end of each module. As you move through the course, you'll get progress reports telling you where to spend extra time studying. Progress reports and fake test reports include an appropriate link button to return to the appropriate part of the course for any question you missed, or any question you want to look at again. Tired of listening to lectures or working on problems? Try accounting for empires, an interactive mobile game experience that can be played alone or as part of a team. Your goal is to build an empire before your exam date by answering practice questions and making progress in your individual study plan. The right answers earn you the resources to build your empire. Gamification relatively In CPA review courses many students such an option is more attractive, although it does not completely replace lectures and practice problems. However, it's a refreshing break from a strict study routine. There is no guarantee of refund, but Baker's promise allows you to repeat the review course at no cost of additional tuition fees as long as you meet their (strict) requirements. Check the Baker website for additional details and restrictions. FastPass option is a training course for those who do not want to spend several months studying for each test. Complete this treadmill review course in less than 12 short but intensive weeks of live lectures and/or classrooms. The final online review is your last chance to really dig down on the most tested topics. If you want to be as ready as you can be, this review covers all four parts of the CPA exam in 38 hours of new video lectures, 800+ multiple selection practice questions and an additional 100 based simulation tasks (with SkillMaster videos). The Baker course can be a concern, even though you get a lot of your money. Unless you qualify for the type of discount or your company is introduced invoice, this is the biggest drawback. There are no audio lectures, but there is an alternative solution if you want to listen to lectures while doing something else. You can download lectures so that they are currently available and listen to them on the app in this way. Hey, it's accounting: it's not all going to be amused! However, there are certainly courses that make the articles and presentations a little more fun. Some popular live coaches don't try to accomplish this by dressing up and performing rap, and there's an animation to mix it up. The option of replaying videos at greater speeds during review or racing through long lectures to save time is also useful. Although Baker is undoubtedly one of the most comprehensive and effective ways to prepare for the CPA exam for most learners, the high price may scare many students. In addition, Baker's frequent updates and ongoing efforts to keep their courses attractive, up-to-date and as close to the exam as possible are impressive. Here's a good tip if you're interested in a good deal: Sign up for premium. It only costs a few hundred dollars more than an advantage but includes a final review, and some extra juicy anecdotes. Ultimately, Baker is a great choice - the materials are really first-class and the organization as close as you can get to the actual exam. If you're still on the fence, we recommend trying the free course offer for 21 days! Yes! Baker offers CPE courses to help established CPAs maintain their certification status. You can subscribe annually to their articles on demand and live on the internet. Yes! Students who need some help covering Baker's tuition can enroll in a flexible payment plan. That's the payment. Any product can be arranged at \$500 and above in 3 months, 9 months or 18-month installments — interest-free! Baker Premium and Pro PC review courses have unlimited access. But when you sign up with Baker Cheaper, your login and license will give you access to study materials for 24 months from the date of purchase. If you are not sure how long you have left on your license, you can check the expiration date in the course support section. While Baker is very good, SSF urgent and Roger are also very convincing pros. Depending on your learning style, any of these 4 can ultimately be best suited to you (and your available time/money). If you haven't already looked at each of these 4 courses, take a quick look at our side-by-side comparison to see what it looks like might be best suited for your situation. Baker is among the most expensive prep courses, with the current price of \$2,299 for their most popular course. Although you can mix different course options and match them to save a bit here and there, most who take the test want to subscribe to the entire package for the best results. Here's the thing: Baker's success rate is really impressive. More than 90% of all Elijah Watt Seal Award winners are prepared with Baker Materials. As a reference, award winners must have a cumulative score above 95.50 on average across all four CPA sections and must pass them on their first attempt. Try.
